DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on April 11, 2006 is acknowledged. The traversal is on the ground(s) that the examiner has not shown the generic claim not to be allowable. This is not found persuasive because the claims were not examined for patentability when the election of species was made.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 3-16 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 11, 2006.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hewitt, US #3,505,749.

5. Hewitt discloses a moving loop device including cover 136 (Figure 6), a rod assembly composed of at least two rollers arranged in parallel, including driving roller

122 and driven roller 123, a suitable driving device (column 8 line 5), display screen 121, labels 128 along the screen, and sensor 126 (column 8 line 11). As described in column 2 line 70 through column 3 line 8, the labels (coded configurations) could be marks that are read by an optical read head.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 6055753 and 6029381 are cited as of interest.
